Example of how to create a part number that includes cable or hose:

A twin 1/4" hose reel with 150' of hose would have a part #:

> The first Set of four numbers is for the reel, without hose:

2268-214R-150

2268

> The second set of three numbers = hose size, the letter Type R or T:

214R

> The last three numbers indicates hose length:

150
